

What is claimed is:

1. An ophthalmic drug delivery device, comprising:
a body having a scleral surface for placement proximate a sclera and a well having
an opening to said scleral surface; and

5 an inner core disposed in said well comprising a pharmaceutically active agent,
wherein said pharmaceutically active agent comprises nepafenac.

2. An ophthalmic drug delivery device, comprising:
a body having a scleral surface for placement proximate a sclera and a well having
an opening to said scleral surface; and

10 an inner core disposed in said well comprising a pharmaceutically active agent,
wherein said pharmaceutically active agent comprises a cyclooxygenase inhibitor.

3. The ophthalmic drug delivery device of claim 2 wherein said
pharmaceutically active agent is a Cox I inhibitor.

4. The ophthalmic drug delivery device of claim 2 wherein said
15 pharmaceutically active agent is a Cox II inhibitor.
